

Sibley Nature CENTER

Detectives ID Game

Print this sheet and bring it with you on your visit to the Sibley Nature Center!

Let's look for clues and tips on:

Hummingbirds

What we know...

- Did you know that Hummingbirds can fly in any direction?
- They have specialized beaks to drink nectar out of flowers
- An average hummingbird's heart rate is more than 1,200 beats per minute.
- Hummingbirds do not suck nectar through their long bills, they lick it with fringed, forked tongues.

What you learned... (Hint: you can use only one fact)

- _____
- _____
- _____

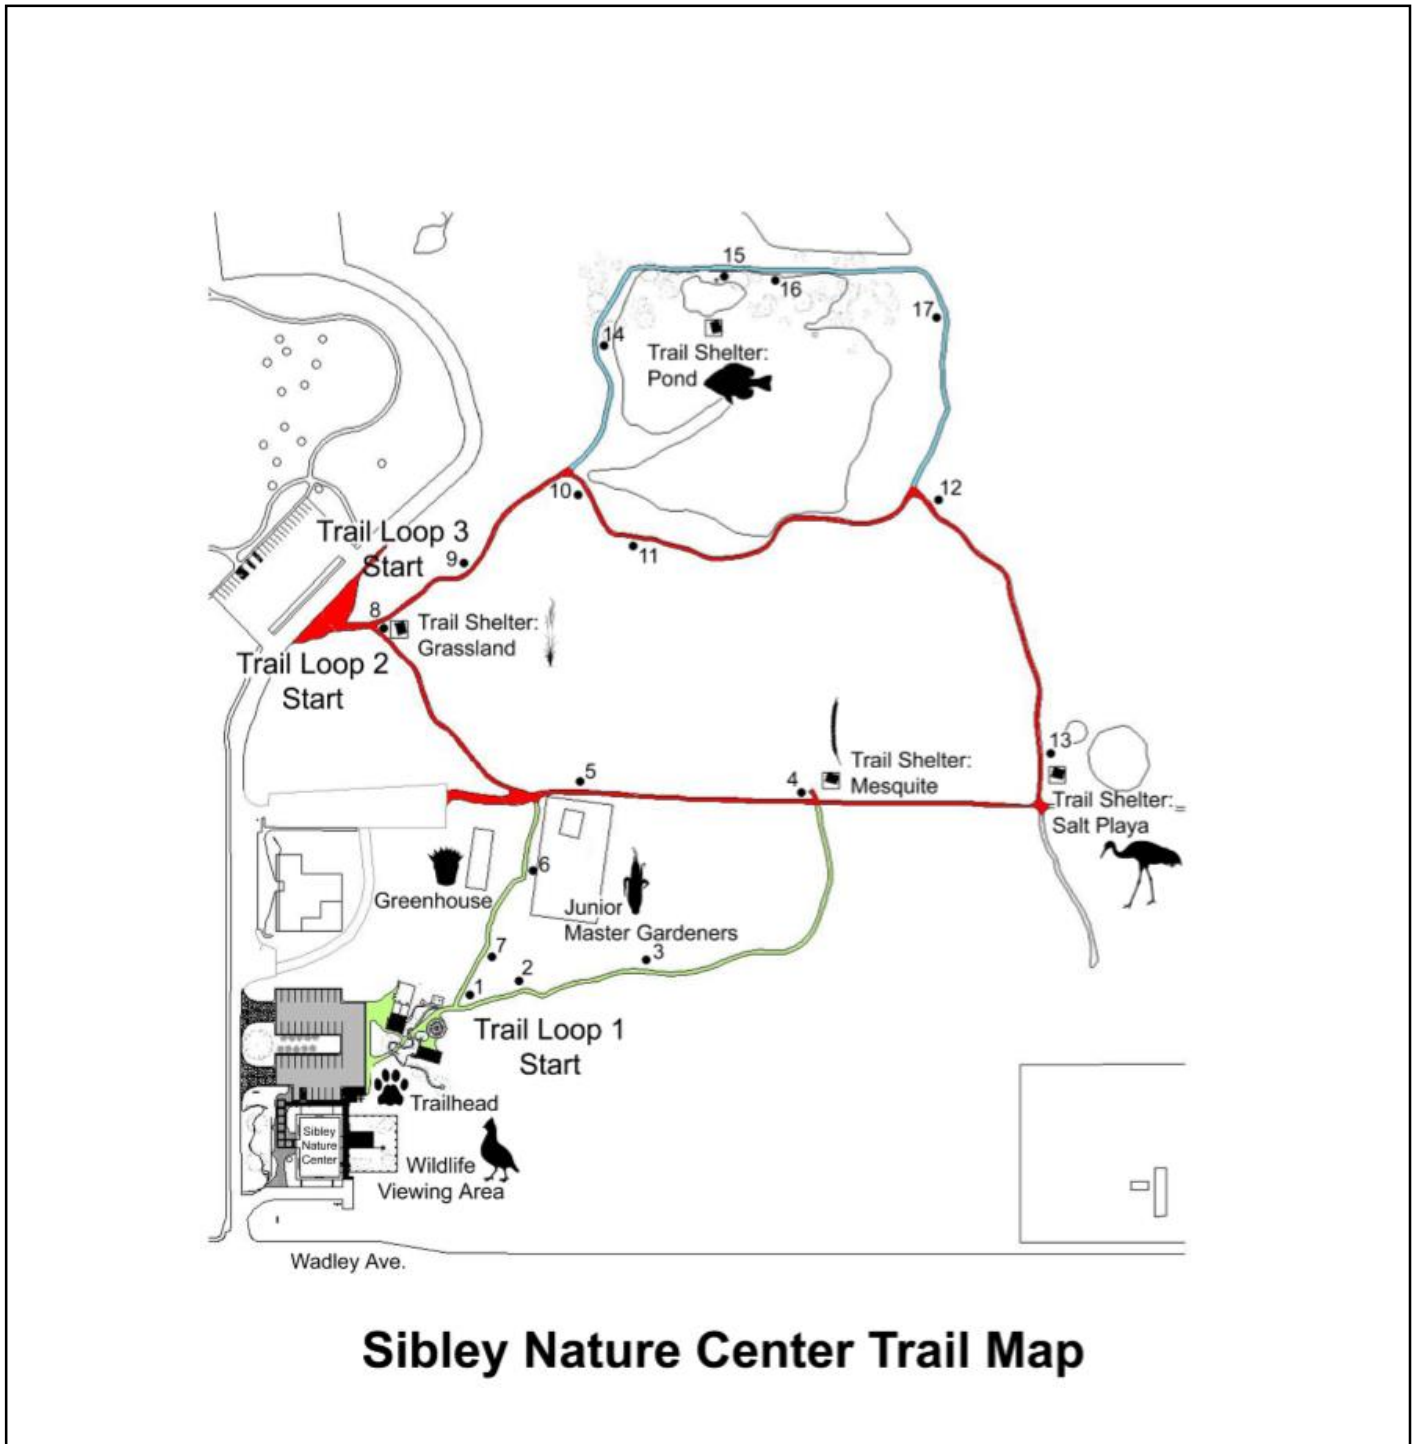

How many did you see on your trail walk?

- _____

Describe what you saw (Draw a picture)

Where did you see it? (Hint: Circle the areas where it was seen)

Turn in to Sibley Front office for a prize!
